

My wife and I are both retired and we are avid RVers. In our travels throughout the USA, we have camped in remote areas and were unable to receive meaningful over the air radio reception. We were isolated and totally in the dark about current weather information and news. Subscribing to XM radio lets us stay in touch with the world. We also enjoy the variety of music programs. I strongly hope that you reject NAB petition04-160. Signed: Fred Duerr
